Operational/GRARB

Schedule of Agent Meetings, July 1956-March 1957

REFERENCES: (1) EGMW-3605, 29 Mar 57; (2) EGMW-3606, 11 Mar 57

1. Attached is a schedule of [] agent meetings carried out since his arrival at MOB on 23 July 1956. In addition to the date, time, and place of meeting and the agent(s) seen, [] has indicated the MAIM number opposite those Contact Reports which have been written to date. This information is not being sent to establish the fact that [] has had a heavy schedule (although he presumes it will also serve that purpose if such is desired), but in order to reduce Headquarters' uncertainty over ARB's various contacts and reports as shown in References (1) and (2). (We have also included [] MOB contacts, feeling you would like to be informed of those also.)

2. As you will note, we have also started a numbering system for 1957 agent meetings, as recommended by Headquarters in Reference (2). We shall mark our presently-written 1957 Contact Reports here with the numbers as shown and we request you do the same with your copies. From now on, we shall add the proper number to the Contact Report as it is typed. In order that this system be understood by all concerned and not become a device to further muddy the waters, this is the procedure we will follow:

a. The Contact Reports of every agent who is always met alone - such as GRIMPASTE or GRBLEND - will of course be numbered consecutively through the year. No problem.

b. The problem comes when two or more agents are contacted at the same meeting. In this case, we plan to assign numbers as we have done below with GRREPAIR-3 and his sub-agents, GRREPAIRs 5, 7, 9 and 11. The number to be assigned will be the correct one for the highest ranking agent present at the meeting - in this example, it is GRREPAIR-3, the P/A - and the others are ignored. When one of the sub-agents is met alone at a later date, as GRREPAIR-9 was (as shown in attachment), then the previous meeting he attended with GRREPAIR-3 is considered his first 1957 meeting (as it was) and his meeting alone with case officer will be numbered 57-2. Successive GRREPAIR-9 meetings with case officer together with GRREPAIR-3 will follow GRREPAIR-3's chronology and GRREPAIR-9's next meeting alone with case officer may be numbered 57-6, for example.

ECMA-26210

3. This system of numbering Contact Reports is the most satisfactory we can devise at the moment. It will be fairly simple to maintain and understand and offers the advantage, for whatever it is worth, of indicating how many times a particular agent has been met during the year. We hope this system is clear and acceptable to you and request your suggestions if it is not.
